Conf. No.: 2139
Title: ACCELEROMETER

Art Unit: 2856
Examiner: Not yet known

Commissioner For Patents
Washington, D.C. 20231

**PETITION UNDER 37 C.F.R. § 1.10(c)
TO ACCORD "DATE-IN" ON EXPRESS MAIL LABEL
AS FILING DATE OF PATENT APPLICATION**

Applicants hereby petition under 37 C.F.R. § 1.10(c) for the Commissioner to accord the "Date-In" on the Express Mail Label used to mail the above-identified patent application as the Filing Date of the application.

On October 19, 2001, the above-identified patent application was filed using the Express Mail Filing procedure set forth under 37 C.F.R. § 1.10. On March 26, 2002, the Patent Office mailed a Filing Receipt showing the Filing Date for this application as being February 19, 2002. A copy of the Filing Receipt is attached hereto at Tab 1.

As required by 37 C.F.R. § 1.10(c)(1), this petition is being filed within 8 days of the mailing date of the Filing Receipt, and less than two months from the granted Filing Date of February 19, 2002, and thus is being filed promptly.

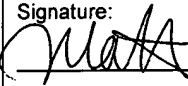

As required by 37 C.F.R. § 1.10(c)(2), the Express Mail Label Number was placed on the papers making up the application. As permitted by MPEP § 513, the papers making up the application filing were filed with a transmittal letter itemizing the contents of the filing and also identifying the Express Mail Label Number used to file the application. This transmittal letter was labeled Utility Application and Application Fee Transmittal. A copy of the Utility Application and Application Fee Transmittal filed with the application and showing the Express Mail Label Number is attached hereto at Tab 2. Similarly, a Return Postcard and a Certificate of Express Mailing were filed with the application itemizing the contents of the filing and also identifying the Express Mail Label Number. A copy of the Return Postcard filed with

the application and showing the Express Mail Label Number is attached hereto at Tab 3. A copy of the Certificate of Express Mailing filed with the application and showing the Express Mail Label Number is attached hereto at Tab 4. Finally, the Application's cover sheet and first page, and the Declaration and Power of Attoreny filed therewith, also identify the Express Mail Label Number. Copies of the cover page and first page of the application showing the Express Mail Label Number are attached hereto at Tab 5. A copy of the Declaration and Power of Attorney filed with the application and showing the Express Mail Label Number is attached hereto at Tab 6.

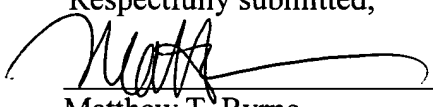

As required by 37 C.F.R. § 1.10(c)(3), this petition includes several true copies of the Express Mail Label used to file the application. These copies of the Express Mail Label are attached hereto at Tab 7. Multiple copies have been provided in an attempt the make as legible as possible the "Date-In" notation on the carbon copy of the Express Mail Label. Unfortunately, the blue carbon copy of the notation made by the clerk at the Post Office when filing the application is difficult to photocopy. Applicants also direct the Commissioner's attention to the stamp made on the Express Mail Label near its upper-right corner by the Post Office which shows the mailing date of October 19, 2001. Applicants respectfully submit that from the "Date-In" notations and the stamp shown on the various copies of the Express Mail Label, the mailing date of October 19, 2001 for this application should be well established.

Accordingly, applicants request that the Commissioner accord the "Date-In" on the Express Mail Label used to mail the above-identified patent application as the Filing Date of the application.

Applicants believe that no fee should be due in connection with the filing of this Petition. Nevertheless, the Director is hereby authorized to charge any fees that may be due in connection with this paper, or credit any overpayment or refund of the same, to Deposit Account No. 50-0324. A duplicate copy of this paper (without attachments) is enclosed.

<p>Certificate of Mailing</p> <p>I hereby certify that this correspondence is being deposited with the United States Postal Service with sufficient postage as first class mail in an envelope addressed to:</p> <p>Commissioner for Patents Washington, D.C. 20231</p> <p>on April 3, 2002.</p> <p>Typed or printed name of person signing this certificate:</p> <p>Matthew T. Byrne</p> <p>Signature: </p>

Respectfully submitted,

FILING RECEIPT

OC000000007721603

Date Mailed: 03/26/2002

Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

ACCELEROMETER

BACKGROUND

The invention relates to accelerometers.

5 Accelerometers are devices that measure acceleration, or changes in a rate of motion. When an elevator starts or stops, several portions of the human body can detect the change in motion and report the change to the brain. Similarly, known accelerometers use different mechanical and electrical techniques to detect changes in motion, and to report the changes to processors. Accelerometers are used in navigational systems, automatic seat belt and air bag
10 triggers, and many other applications.

 In known techniques for manufacturing semiconductors, a single crystal of silicon is grown, and then photographic and lithographic techniques are used to etch away unwanted parts of the silicon, and to introduce doping atoms into the silicon to change the electrical properties of the silicon. It is also known to deposit other materials onto the silicon – for example, thin layers
15 of metal may be deposited onto the silicon to serve as conducting wires between different portions of a circuit. The underlying silicon serves as a structural base to provide mechanical support for the metal, while the metal provides the electrical conductivity.

SUMMARY

20 In general, in a first aspect, the invention features an accelerometer. The accelerometer includes a fixed structure, a movable structure, and a resilient coupling. The fixed and movable structures generally lie in a plane. The fixed structure bears a fixed electrode, and the movable structure bears a movable electrode. The resilient coupling is designed to retain the fixed and movable structures in capacitive opposition to each other across a capacitance gap while
25 allowing motion of the movable electrode relative to the fixed electrode in response to acceleration along an axis of acceleration perpendicular to the plane, and to resiliently restore the two electrodes to an equilibrium position when the acceleration ceases. Electronics and/or software is designed to translate a measurement of capacitance between the fixed and movable electrodes into a measurement of the acceleration along the axis.

30 In general, in a second aspect, the invention features an accelerometer. The accelerometer includes a fixed portion, a movable portion, and a resilient coupling. The fixed and movable portions generally lie in a plane. The resilient coupling is designed to allow motion

Commissioner For Patents
Washington, D.C. 20231

**PETITION UNDER 37 C.F.R. § 1.10(c)
TO ACCORD "DATE-IN" ON EXPRESS MAIL LABEL
AS FILING DATE OF PATENT APPLICATION**

Applicants hereby petition under 37 C.F.R. § 1.10(c) for the Commissioner to accord the "Date-In" on the Express Mail Label used to mail the above-identified patent application as the Filing Date of the application.

On October 19, 2001, the above-identified patent application was filed using the Express Mail Filing procedure set forth under 37 C.F.R. § 1.10. On March 26, 2002, the Patent Office mailed a Filing Receipt showing the Filing Date for this application as being February 19, 2002. A copy of the Filing Receipt is attached hereto at Tab 1.

As required by 37 C.F.R. § 1.10(c)(1), this petition is being filed within 8 days of the mailing date of the Filing Receipt, and less than two months from the granted Filing Date of February 19, 2002, and thus is being filed promptly.

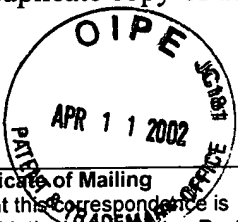

As required by 37 C.F.R. § 1.10(c)(2), the Express Mail Label Number was placed on the papers making up the application. As permitted by MPEP § 513, the papers making up the application filing were filed with a transmittal letter itemizing the contents of the filing and also identifying the Express Mail Label Number used to file the application. This transmittal letter was labeled Utility Application and Application Fee Transmittal. A copy of the Utility Application and Application Fee Transmittal filed with the application and showing the Express Mail Label Number is attached hereto at Tab 2. Similarly, a Return Postcard and a Certificate of Express Mailing were filed with the application itemizing the contents of the filing and also identifying the Express Mail Label Number. A copy of the Return Postcard filed with

the application and showing the Express Mail Label Number is attached hereto at Tab 3. A copy of the Certificate of Express Mailing filed with the application and showing the Express Mail Label Number is attached hereto at Tab 4. Finally, the Application's cover sheet and first page, and the Declaration and Power of Attoreny filed therewith, also identify the Express Mail Label Number. Copies of the cover page and first page of the application showing the Express Mail Label Number are attached hereto at Tab 5. A copy of the Declaration and Power of Attorney filed with the application and showing the Express Mail Label Number is attached hereto at Tab 6.

As required by 37 C.F.R. § 1.10(c)(3), this petition includes several true copies of the Express Mail Label used to file the application. These copies of the Express Mail Label are attached hereto at Tab 7. Multiple copies have been provided in an attempt the make as legible as possible the "Date-In" notation on the carbon copy of the Express Mail Label. Unfortunately, the blue carbon copy of the notation made by the clerk at the Post Office when filing the application is difficult to photocopy. Applicants also direct the Commissioner's attention to the stamp made on the Express Mail Label near its upper-right corner by the Post Office which shows the mailing date of October 19, 2001. Applicants respectfully submit that from the "Date-In" notations and the stamp shown on the various copies of the Express Mail Label, the mailing date of October 19, 2001 for this application should be well established.

Accordingly, applicants request that the Commissioner accord the "Date-In" on the Express Mail Label used to mail the above-identified patent application as the Filing Date of the application.

Applicants believe that no fee should be due in connection with the filing of this Petition. Nevertheless, the Director is hereby authorized to charge any fees that may be due in connection with this paper, or credit any overpayment or refund of the same, to Deposit Account No. 50-0324. A duplicate copy of this paper (without attachments) is enclosed.

Certificate of Mailing
I hereby certify that this correspondence is being deposited with the United States Postal Service with sufficient postage as first class mail in an envelope addressed to:
